Enjoy!. total oldschool. its a funny game. I'm pretty sure I have no written reviews on any steam games in my library which can say a lot about me and the validity of this review; but the other way to see it is by me taking the time to write this review should say a lot about this game and how much I believe in it and that it deserves as much attention as it can and If my review can help then I'll do everything I can to make it so.

This is one of those fun games that are quick and easy to pick up and get into the action but can take forever to fully master. Uniball was one of the first PC games I got into playing when I first got a computer well over a decade ago. It has stood the test of time and remained alive still till this day. I'm excited for its steam release and to see how big the community can grow.

I recommend you at least give this game a try. If you've ever played the likes of SubCspace: Continuum, Soldat, Haxball and the such then you should be able to appreciate this game and have a good time.

The only con would be its graphics but that can also be a positive because it means pretty much anyone can play this game even on a laptop. Graphics can always be addressed later with the likes of say graphic packs.

If you like competitive team based games then do yourself a favor and give this game a try!. Love this game 10/10 looks very nice can do whatever you want WHENEVER you wan't must buy game always chilling with mates on this one :). I bought this game when it first came to steam only to have it refunded, months and months have passed and I got the game again since it was on sale for only 2.50\$!! Sadly though it needs so much work to be fun. I love sim\management games and it seems that American football and Basketball sims are just never done right or even close to what should be a higher standard in 2017. This game is to management sim games like Lonzo Balls shooting in the nba, its just cringe.

I don't have much good to say about the game because its so boring I can't even play it. But I can tell you why I have issues with it. First has no music, give us some 8-bit or something so it doesn't feel like I'm playing a game in DOS. There is no fantasy draft so you can't build your own team only take over a team and what's even way worse is there isn't even trading! User interface is confusing, players need a better rating system too. And lastly its just not fun if your looking to manage a team in the NBA...

If there game ever gets better features or some patch I will change my review. I want to change my review, its sad that there is not one decent bball game on steam, the games would sell if they were actually done right.. I played this game on kongregate years ago and decided to buy it here to support the developer. It's addictive and has a neat little story.

Helps set the mood. Perfect for relaxing. Magic muffins optional.. Wow, I wanna start this off by applauding the developers for really taking the time to make sure this game feels just like an old school resident evil or silent hill. Much better than the resident evil 2 remake did (For comparison). The game is absolutely brutal in difficulty and you really do feel helpless with even just a few enemies in the room. Unless I'm misunderstanding the way saves work, saves are incredibly scarce as well. So if you're in it to kick it old school, you've come to the right place. 8/10.

Spoiler: by the end of the video I was out roughly 1 hour of game progression from my death. <https://youtu.be/uYZSEjgkous>. The cutscenes and documentary movies were great and the menu music was really catchy. unfortunately the gameplay was really bad. I went to youtube to watch the cutscenes (it's actually a movie just cut into bits around the gameplay).

There is a hint system if you get stuck on a puzzle which is a good addition.

I can't recommend the game, but I do recommend watching the clips.. This game is actually amazing. I love playing it with my partner. It took us a long time to find a game we both liked and could play together. But for some reason, I have played much larger games on this same PC and even after deleting them, this one still crashed. All I need to do is click on a building, be it library, stables, forest etc... just one click and it crashes. It has worked fine before, and like I said, I have played much loarger online games fine. I don't understand why it works fine for my partner and crashes at first click for me. Please can you advise me on how to rectify this? Or maybe if the issue is not on my end, could you please fix this issue? Thanks in advance.. This game was A BLAST ! Literally i had alot of fun playing it even if it lookd very simple , the art style reminds me of the 90s and the art for the game is cute even if its made in MS paint (good one) , Anyway I did Review on The Game At <https://www.youtube.com/watch?v=KV7WunPEzI> .
